Fire & Smoke Damage Restoration

A fire loss is very devastating. It affects everything. We salvage and restore any of the contents that are restorable. We take an inventory of all items that can and cannot be saved. We carefully pack and remove each item. We act quickly for the reason that we know you want your residential/commercial property quickly restored so that you can resume living and or working there.

Mohave Cleaning and Restoration cleans out all of the damaged areas so that reconstruction can begin immediately.

Mohave Cleaning and Restoration takes your contents to a restoration facility and restores them to the pre-fire condition. When ready, we return the items to you as quickly as possible.

Mohave Cleaning and Restoration knows how important it is to you to have a speedy recovery from your painful event.

Electronics & Equipment

The key to restoring electronics is taking prompt action to prevent further damage. Smoke residues can contain acids that will corrode metal surfaces when moisture is also present. If the residues are not removed, corrosion eats away at metals and causes electronic failure in the device.

The Mohave Cleaning and Restoration professionals know who the best restoration electric technicians are. They have the best technical equipment to responsibly do the cleaning so that corrosion will be halted.

It is very important NOT to turn on electrical equipment that may have been damaged.

Air Ducts/HVAC Cleaning

Many of our restoration jobs have included cleaning inside the ventilation system of damaged properties. But even undamaged properties can have dirty ducts that circulate odors, contaminants like mold, and irritating dust throughout your building or home. We can thoroughly clean, sanitize and deodorize your air ducts and HVAC system.

Yes, we do wall, ceiling, window, cabinet, and outdoor power washings...and anything else.

Commercial & Residential Emergency Service

Commercial

When you have unexpected down time, you have an emergency. WE UNDERSTAND. We respond immediately to your situation. We are ready to provide you with expert fire and water cleanup and restoration services. We want to reduce your business interruption and recovery costs.

When you experience a fire, water, or mold damage, you need fast response and the expertise to handle the situation to get you back into operation as quickly as possible. Through it all, you expect the very best service at a fair price.

Residential

Your emergency is our emergency. We are standing by for your call, 24 hours a day, 7 days a week. We are ready. If your home has been damaged by fire or water, or anything else, we will do our absolute best to clean and restore your home and personal property quickly, allowing you to get back to living your life.

Satisfied Customers

The bottom line is that Mohave Cleaning and Restoration delivers! Our newly installed stone floor needed professional help, and their company came highly recommended. When you need professional friendly service that is on-time, done correctly, leaves a cleaned up job site, and follows up to be sure you are pleased...then call Mohave Cleaning and Restoration. You'll be happy campers!
—Sheila S., Bullhead City, AZ

Mohave Cleaning & Restoration restored my home after a fire. From the beginning, you were on the ball making sure the job was done to my satisfaction. You didn't miss a thing. You inspected all electrical and plumbing so that all was in good working order. You also inspected the property for water and mold damage. You have lots of great knowledge. You were very confident in the job he performed for us.

All the damaged dry wall was removed. You matched the texture and the paint. You made sure I picked out the right carpet and pad. You replaced the ceiling fan, hung the blinds and cleaned the duct work. You even replaced all batteries and light bulbs. You removed the debris and left the property clean.

Mohave Cleaning & Restoration had a wonderful attitude. You never seemed rushed or short tempered. You were very considerate of our well-being. You even went to the next level of service and identified a refund for us from a vendor, that we were not expecting. Thanks from a satisfied customer!
—Rose R., Lake Havasu City, AZ and Bend, OR

Just wanted to let you know how much we appreciated the many phone calls you made to keep us posted on the progress the workers were making. Since we were not home at the time of the damage, it was very comforting to know we were in such good hands. Thanks so much to you and your workers, too.
—Shirley C., Lake Havasu City, AZ

Mold

Mold happens. In our warmer climate, we are the 6th worst area in the United States for mold. We have seen the devastating effects that this intruder causes. In the worst case scenario, mold does affect the health of those exposed.

As we scrub your property, we take extra precautions to make sure the remediation is done by all the rules and guidelines taught to us by the Institute of Inspection, Cleaning, and Restoration. With this specialized training, we have successfully removed mold from many properties. We ensure that the properties are scrubbed clean by having the properties tested by licensed and reputable companies. When we turn the keys back to you, you will have a certificate that ensures the job is successful and complete.

Water Removal and Dehumidification 24/7

If you want the best, we are the best. We use nothing but the most efficient equipment. We quickly assess the damage, take photos for documentation purposes, and then get to work the same day the damage is reported. That same day your property will be on its way to being dry. Mohave Cleaning and Restoration professionals have the equipment and experience necessary to handle the most challenging situations.

We safely dry, deodorize and disinfect the areas flooded or damaged by water so that no further damage can occur. We meticulously ensure your property is completely dry so that mold cannot cause you any further damage. Mohave Cleaning and Restoration professionals know the value of dehumidification. We are known to save property owners, businesses, and insurance companies money in restoration and replacement costs by knowing exactly how to dry out your property.

The dehumidifiers operated by Mohave Cleaning and Restoration professionals have the power and capability of removing water and moisture from drywall, plaster, interior painting, cement floors, tile, carpets, insulation, and basements. Drying time is reduced because Mohave Cleaning and Restoration restorers adjust the locations and types of dehumidifiers as drying conditions change. The results are exceptional and efficient.
